Having been active in the wind power sector since 1999 we've done more than just kicked up some dust. Within a short space of time Bachmann electronic became market leader and our automation systems set the industry standard for quality and dependability. Bachmann electronic automation solutions are designed to meet and exceed our customers' requirements.

- Reliable automation for extreme environmental conditions
- Compliance of all standards (IEC, UL, GL)
- Range: -60°C – +90°C, 25g shock (HALT test)
- Optimization of your investment with 99.97% proven availability
