Handy Moving System A/S has moved 138 complete mail sorting facilities in a patented frame construction with air bearing system in Denmark, Sweden and USPS Chicago resulting in extremely satisfied customers.

All mail sorting facilities have been moved internally at the post hubs within maximum 10 hours and externally within maximum 48 hours. All facilities have been moved in full length internally and in maksimum length externally.

Advantages:

- No loss of time and production
- Maximum internal moving time - 10 hours
- External moving - on request
- Patented Moving System - worldwide
- Minimum of de-mounting and mounting
- High extent of know-how
- Extremely resource efficient
- References and demonstration video on request

During 2007/8 we moved no less than 45 machines with a length of 24-56 meters / 228 square meters for the Swedish, Danish and USPS Chicago Post.

PRODUCTS

Complete removal of machines internally and externally

Turnkey removals
